

Still

BRANDBOOK / V3.0 / 29 AUGUST 2026

Quiet technology for the moment before an automatic opening.

One system, four layers.

Use the system from left to right. Strategy decides what belongs. Identity makes it recognizable. Product makes it useful. Communication makes it repeatable.

01

Strategy

Purpose, position,
principles

02

Identity

Mark, type, color, field

03

Experience

Product, web, motion,
access

04

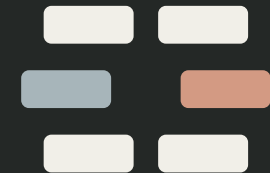

Expression

Voice, imagery, campaign,
QA

BRAND ESSENCE

Make the automatic moment visible. Then give the choice back.

Still is not a blocker, a detox ritual, a score or a productivity judge. It is a quiet instrument for noticing what just happened and choosing what happens next.

Positioning that holds up in product.

FOR

People who open a few apps by reflex and want a brief, non-punitive interruption.

STILL IS

A quiet attention utility that inserts one conscious second, records the result locally and turns verified revenue into a visible impact record.

UNLIKE

Detox products, streak systems, app blockers and motivational wellness brands.

BECAUSE

The intervention preserves agency: go back in one tap or continue intentionally for a clear duration.

Warm in posture. Precise in evidence.

01

Calm

Never urgent or euphoric

NOT MEDITATIVE

02

Human

Respectful, concrete,
non-moral

NOT CUTE

03

Precise

Measured states and
provenance

NOT CLINICAL

04

Contemporary

Digital, material,
reduced

NOT TREND-LED

Learn from behavior. Refuse the category costume.

- one sec: brief friction changes automatic behavior; do not copy breathing or dopamine language.
- Brick: one clear action explains the product; do not copy the physical object or 'take back your time'.
- reMarkable and Teenage Engineering: material restraint plus functional color; do not simulate paper or retro controls.
- Stripe Climate and Watershed: show source, state and proof; avoid climate-tech spectacle.
- Dear Data and MIT physicalization: data can feel personal or physical only when every mark is explainable.
- Apple HIG: motion is feedback and state change; never loop the interruption.

What makes attention products look interchangeable.

Purple-blue glow

Glass panels

Rounded cards in cards

Generic wellness copy

Scores and streaks

Leaf or planet shorthand

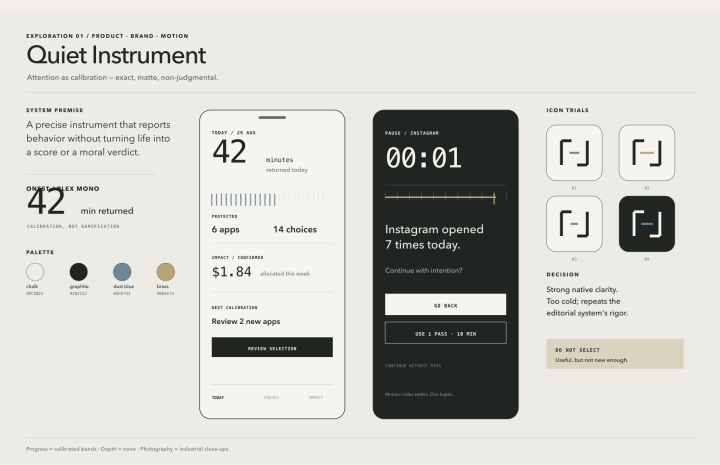

Decorative 3D blob

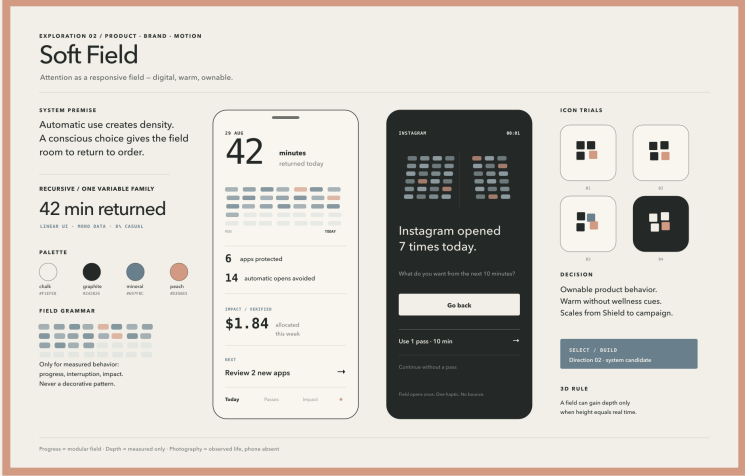

Hero plus three feature cards

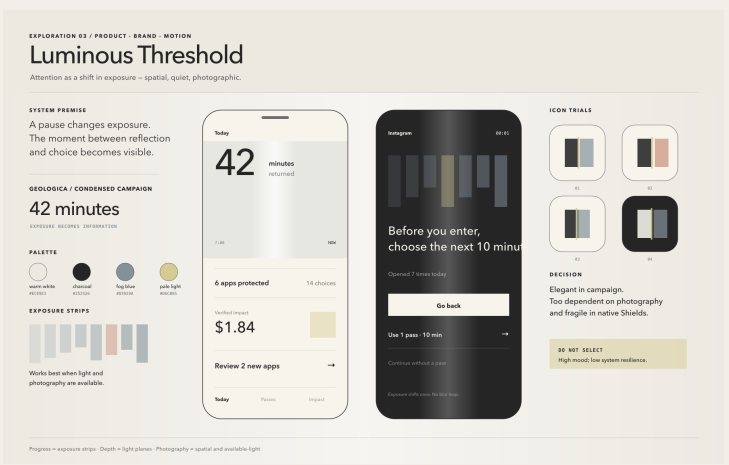

Three systems. One selected direction.

01 / QUIET INSTRUMENT

02 / SOFT FIELD / SELECTED

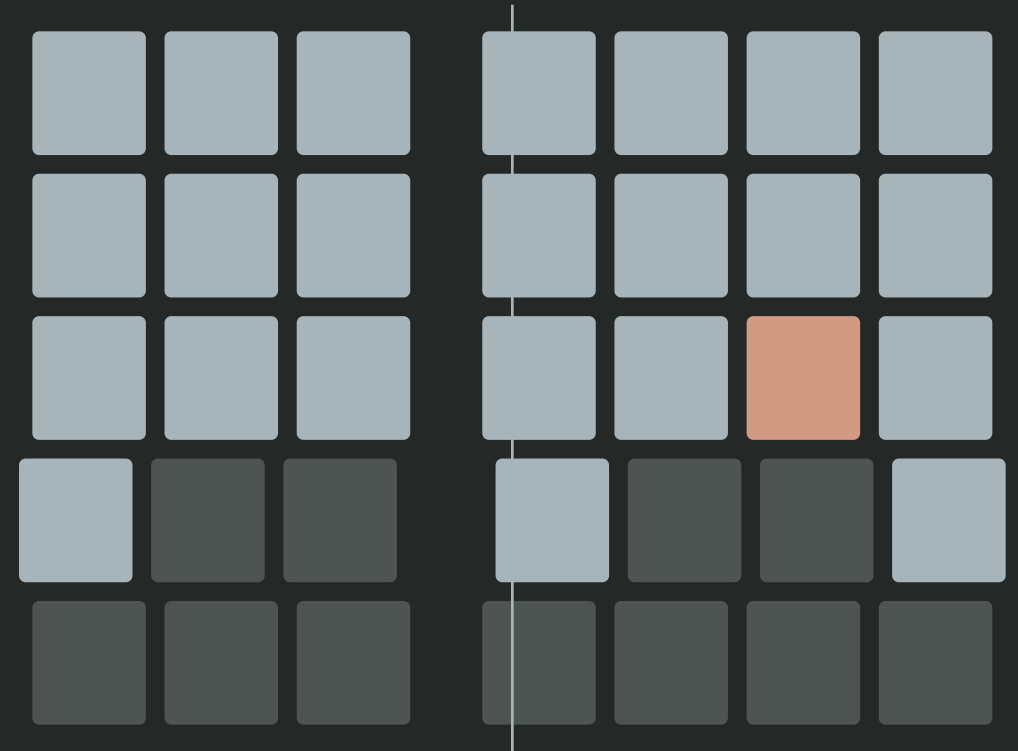

03 / LUMINOUS THRESHOLD

SELECTED CONCEPT

Soft Field

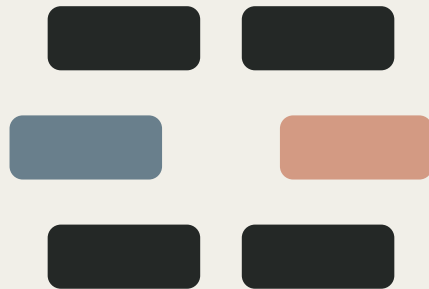

Automatic behavior is dense. One second opens space. The choice becomes visible without turning the person into a score.

The field is never wallpaper. If a module does not encode progress, choice, allocation or transition, remove it.

Field Aperture / 06

Six measured modules. The middle pair opens. Mineral records the field; peach records an intentional continuation.

THE NEGATIVE SPACE IS THE PAUSE

- 12 x 12 unit construction; module 4.4 x 1.85 units.
- One-color fallback: all graphite or all chalk.
- At 32 px: align to whole pixels and remove optical radius.
- Never add clock, leaf, phone, brain, pause bars, shadow or gradient.

Still

CLEAR SPACE

Keep one module height around every side.

Minimum digital mark: 24 px. Minimum lockup: 88 px.

CORRECT

- Chalk on graphite
- Graphite on chalk
- Single-color where necessary

NEVER

- Stretch or rotate
- Recolor individual modules
- Put inside another tile
- Use the field as decoration

One icon. Native masks only.

PRIMARY / CHALK

DARK SURFACE

IDENTITY / ICON STUDY

The pause is negative space.

Twelve constructions tested as a mark, an app-icon and a 32 px glyph.

01 TRIAL

02 TRIAL

11 TRIAL

12 TRIAL

SELECTION CRITERIA

32 px legibility

not a literal pause icon

not an app-grid tile

behavior before decoration

one color fallback

Selected 06: six measured modules open around the center; the offset pair records the moment of choice.

12 EXPLORED CONSTRUCTIONS

Warm neutral. Mineral signal. Human exception.

Chalk

#F1EFE8

Graphite

#242826

Mineral

#697F8C

Peach

#D39A83

Fog

#D9DEDC

ENVIRONMENTAL MEANING COMES FROM EVIDENCE, NEVER FROM A GREEN WASH.

Brand accents do not impersonate system states.

Success

#2F6B4A

Confirmed or complete

Warning

#9A6A27

Pending or expiring

Danger

#A9473E

Destructive or error

Focus

#315CBE

Focus ring only

Never rely on color alone. Pair every state with a word, icon or position. Contrast targets: AA for all UI text and visible focus on web.

Recursive is the entire typographic voice.

Aa 42

00:01 \$1.84 7/14

DISPLAY / MONO 0 / CASL 0.08 / 520-600

Short product statements. Never grandiose marketing claims.

DATA / MONO 1 / CASL 0 / 500-650

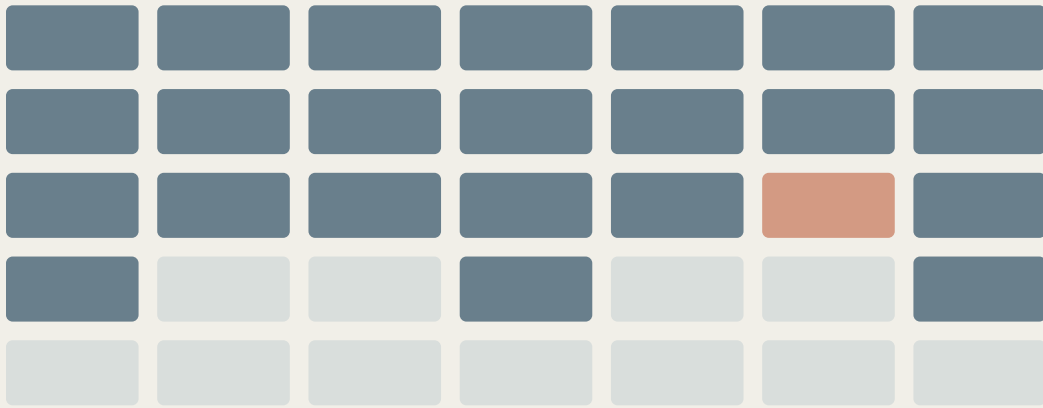

Time, money, counts and IDs use tabular alignment.

UI stays linear and steady. Human notes may use CASL 0.16 rarely. Never animate axes while text is being read.

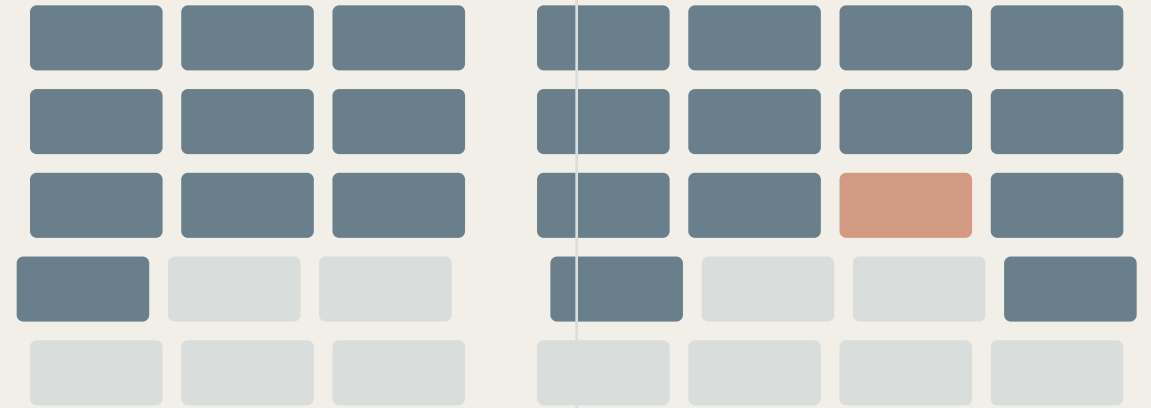

A scale for hierarchy, not spectacle.

TOKEN	MOBILE / WEB PX	LINE HEIGHT
display-hero	58 / 72-152	.92
display	44 / 48-92	.98
heading-1	32 / 52	1.04
heading-2	24 / 36	1.12
body	16 / 17	1.50
label	11 / 11	1.35
data-hero	72 / 112	.92

The ownable visual is a behavior.

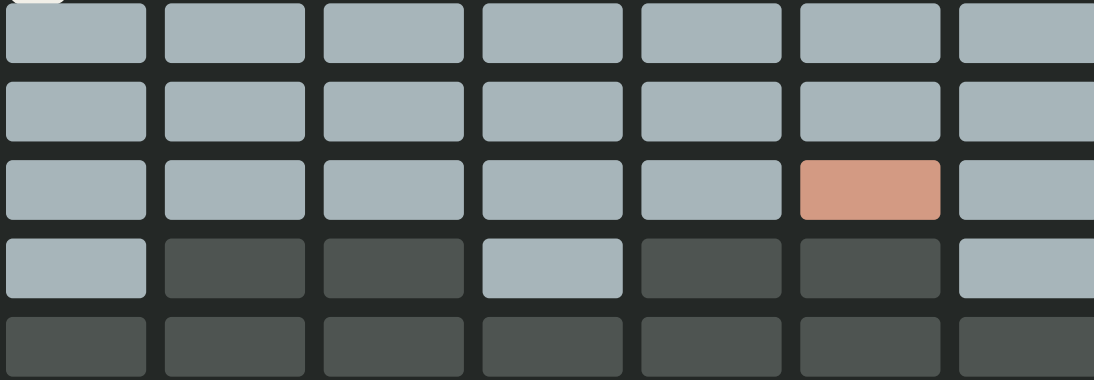

AUTOMATIC / DENSE

CONSCIOUS / SPACE OPENS ONCE

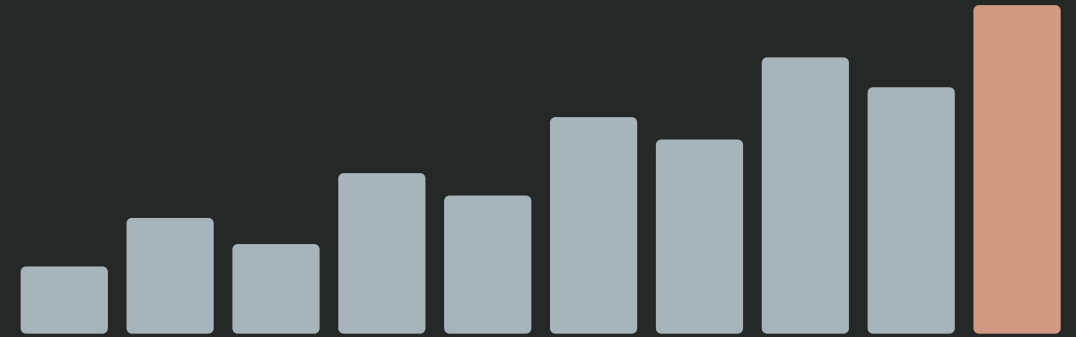

Modules encode minutes, decisions, days or allocated value. Every field needs a readable label and disclosed scale.

Progress without rings, bars or grades.

7-DAY ATTENTION FIELD

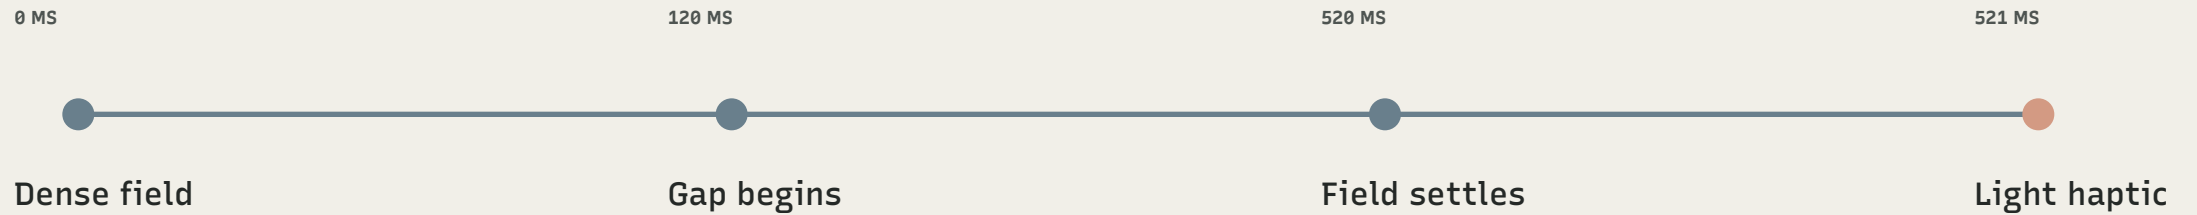

Peach means an intentional pass, never failure. Today is named in text. Accessibility reads the actual minutes.

CONFIRMED VALUE GAINS DEPTH

Optional 3D is orthographic and data-bound. Pending value stays flat. No spheres, stones, seeds or decorative depth.

Motion creates an exit, then stops.

Easing cubic-bezier(.16, 1, .3, 1). No loop. No bounce. Reduced motion renders the final state immediately while keeping the one-second numeric timer.

PHOTOGRAPHY

Show what attention makes room for.

- Natural window light and ordinary color temperature.
- Hands making, repairing, writing, cooking or waiting.
- Phone absent or peripheral; no staged detox relief.
- Keep environmental evidence in the crop.

Tactility lives in edges, rhythm and restraint.

TEXTURE

1-2% monochrome noise only inside a measured module, campaign numeral or confirmed extrusion.

RADIUS

2-5 px for modules; 8 px maximum for surfaces; native system masks remain native.

SURFACES

Flat by default. Elevation only when a layer physically floats over another.

AVOID

Global grain, paper fibers, glass, clay, pebbles, inflated blobs, soft cards and atmospheric glow.

One protagonist. Open groups. Shared baselines.

BASE

4 px

RHYTHM

8 / 12 / 16 / 24 / 32 /
48 / 72 / 96

MOBILE EDGE

24 px

WEB MAX

1320 px

COPY

34-46 characters

Use alignment, whitespace, rules and type before adding a container. Cards are reserved for true grouped objects or elevated native surfaces.

Central tokens, shared logic, native expression.

COLOR

brand.*, surface.*, text.*, border.*, state.*

SPACE

1=4, 2=8, 3=12, 4=16, 6=24, 8=32, 12=48

MOTION

fast 160, open 520, slow 720; standard and exit easing

TYPE

display, heading, body, label, data

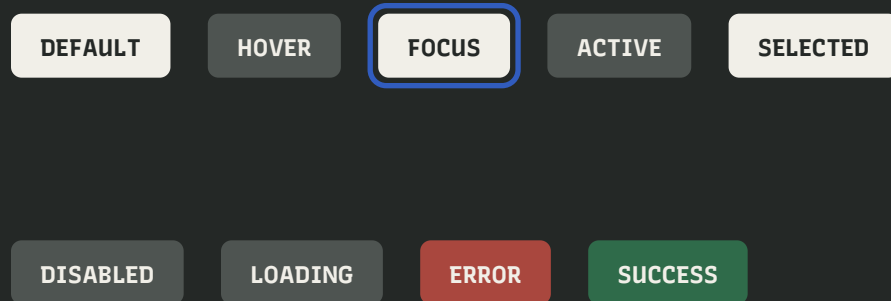

SHAPE

module 2-5, surface 8, native mask system-owned

ELEVATION

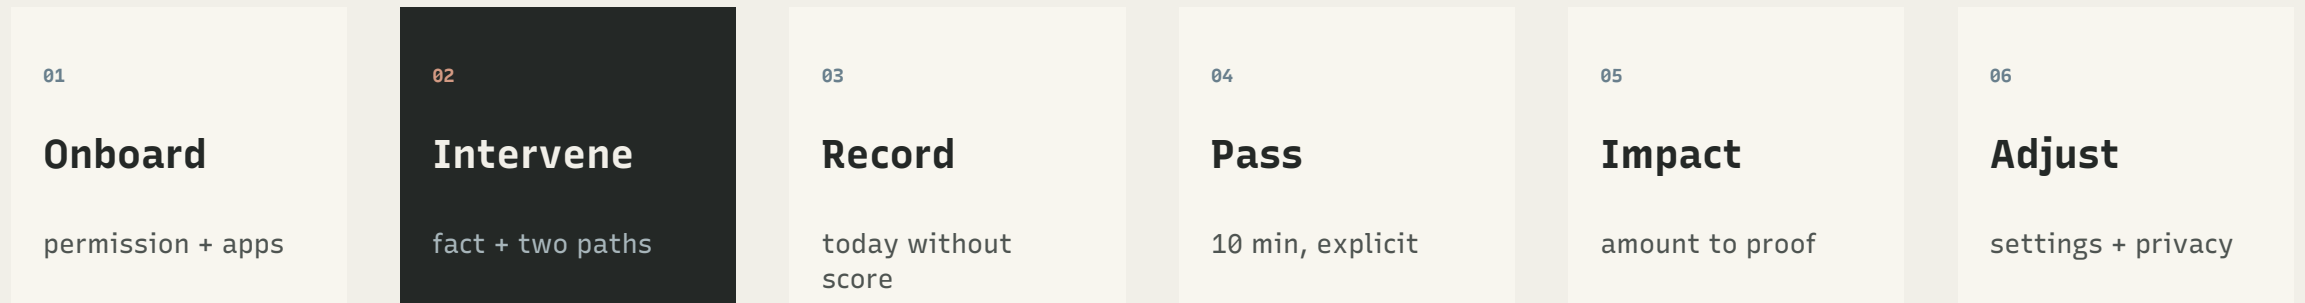

none, overlay, native-modal; never decorative

Controls are plain. State is explicit.

Button: text plus action, 44 pt iOS / 48 dp Android minimum. Inputs: visible label, hint and error. Lists: rules before cards. Progress: field plus readable summary. Dialogs: one decision, one exit.

The product starts with the moment of choice.

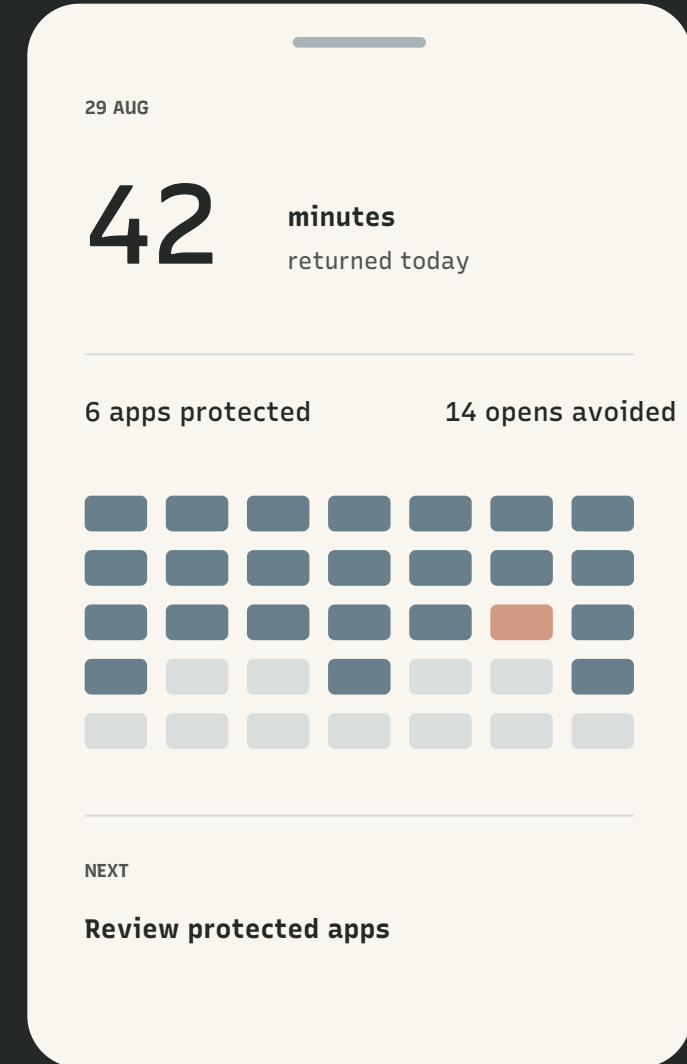

Preserve existing permissions, native restrictions, timed passes, wallet, impact states and settings. Redesign hierarchy and feedback without inventing functionality.

TODAY

Five answers in the first viewport.

- 1. Minutes returned today
- 2. Apps protected
- 3. Seven-day progress
- 4. Impact amount and state
- 5. Next meaningful action

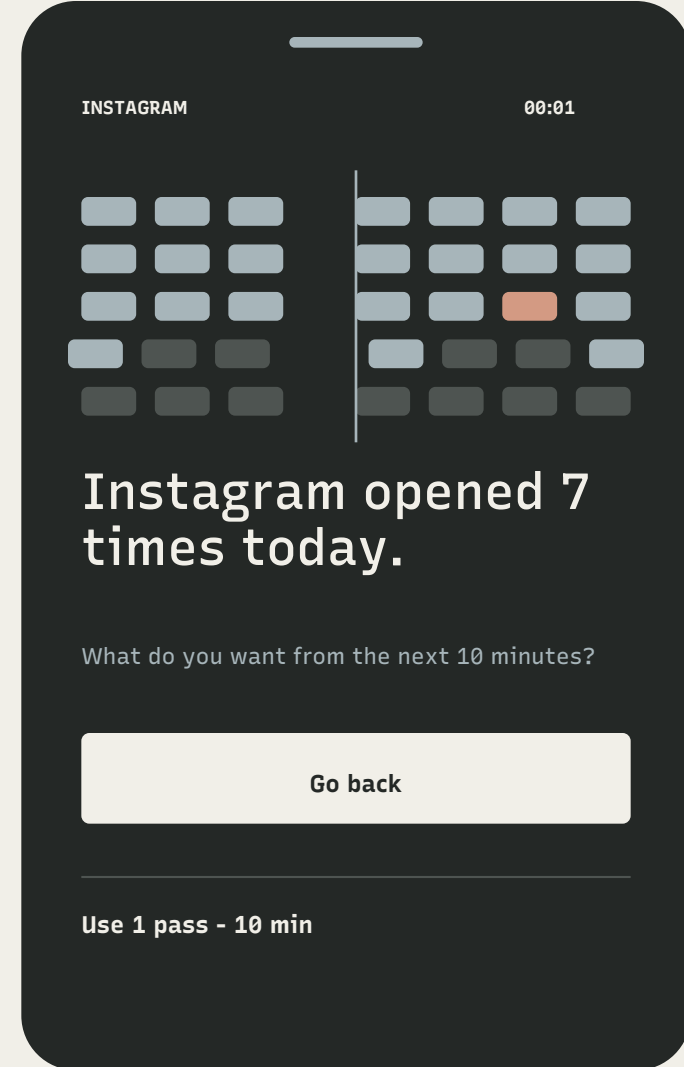

No greeting, quote, score, streak or motivational card. One metric leads; the rest form a compact reading sequence.

MOST IMPORTANT SCREEN

Automatic becomes conscious without punishment.

- App context plus 00:01
- Observed fact, never diagnosis
- Question names the next 10 minutes
- Primary: Go back
- Secondary: Use 1 pass - 10 min
- One motion, one haptic, no loop

IMPACT RECORD

Evidence before emotion.

- Amount and calculation source
- State: estimated, reconciled, donated or published
- Allocation criteria and vote
- Selected project and publication date
- Transfer proof only after publication

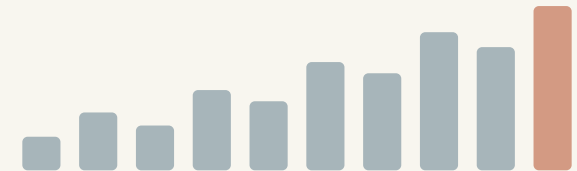

Never imply donation before transfer. Campaign examples must say illustrative; public numbers must come from the live ledger.

IMPACT / WEEKLY RECORD

ILLUSTRATIVE VALUES. PUBLISH LIVE LEDGER DATA ONLY.

Intervention. Record. Evidence.

STILL / INTERVENTION

See the moment before you enter.

A one-second pause makes an automatic opening visible.

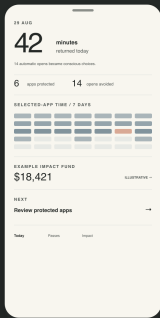

GO BACK IN ONE TAP / CONTINUE FOR A CLEAR 18 MINUTES

STILL / TODAY

A record. Not a score.

Time returned, protected apps, progress and the next action.

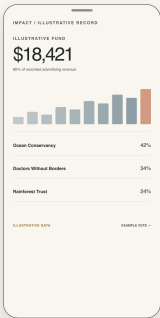

ILLUSTRATIVE INTERFACE / DETAILED DATA STATE ON DEVICE

STILL / WEEKLY IMPACT

Impact leaves a record.

Amount, state, allocation and proof — in that order.

ILLUSTRATIVE INTERFACE / LIVE PROOF FOLLOWS THE TRANSFER

ILLUSTRATIVE VALUES MUST BE REPLACED BY A VERIFIED LEDGER SNAPSHOT BEFORE PUBLICATION.

No testimonial without evidence and permission.

- Verify exact words
- Verify identity and role
- Record explicit publishing permission
- Preserve context
- Date the approval

Until all five conditions are met, the social-proof template remains blocked by design.

SOCIAL PROOF / PUBLISHING GATE

“Approved quote goes here.”

NAME / ROLE

This template must not ship until the quote, identity, permission and wording are verified.

BLOCKED BY DESIGN

Still does not fabricate testimonials.

STATUS / AWAITING VERIFIED PARTICIPANT EVIDENCE

Recognition comes from disciplined repetition.

DO

- Use the field only for data or transition
- Name the observed fact
- Keep one protagonist metric
- Show impact state and proof
- Let photography show the result of attention
-

DO NOT

- Add leaves, rocks, planets or eco symbols
- Use beige plus sage as a shortcut
- Add decorative 3D or global grain
- Stack rounded cards
- Use grandiose wellness copy
-

Calm cannot come at the cost of access.

- ☐ WCAG AA text contrast
- ☐ Visible web focus
- ☐ Dynamic Type keeps CTA order
- ☐ State never color-only
- ☐ 44 pt iOS / 48 dp Android targets
- ☐ Reduced-motion final state
- ☐ Field has readable summary
- ☐ Native intervention preserves context and two paths

If any answer is yes, redesign it.

01 Is nature carrying the concept?

02 Is a blob or 3D object only decorative?

03 Are there more containers than groups?

04 Could the copy belong to any wellness app?

05 Does motion loop or perform?

06 Does impact lead with sentiment?

07 Is texture reducing legibility?

08 Is the field present without data?

The system is ready to continue, not to drift.
